

**Prova lliure per a l'obtenció del títol de Graduat en Educació Secundària
Obligatòria per a majors de 18 anys**

Convocatòria 2026

ÀMBIT DE COMUNICACIÓ

Llengua estrangera (ANGLÈS)

- A. READING COMPREHENSION. Read the text and answer the true/false questions below. Circle the correct answer. (20 points)**

Artificial Intelligence

Artificial intelligence (AI) is transforming the way humans live, work, and interact with the world. At its core, AI refers to machines designed to perform tasks that typically require human intelligence, such as learning, reasoning, problem-solving, and decision-making. From voice assistants and recommendation systems to self-driving cars and medical diagnostics, AI has become deeply integrated into everyday life.

One of the most powerful aspects of AI is its ability to process vast amounts of data quickly and accurately. This enables businesses to make better decisions, scientists to accelerate research, and healthcare professionals to improve patient outcomes. For example, AI systems can analyze medical images to detect diseases earlier than traditional methods, potentially saving lives.

However, the rise of AI also brings challenges. Ethical concerns, such as data privacy, bias in algorithms, and the impact on jobs, must be carefully addressed. As machines become more capable, it is important to ensure that AI is developed responsibly and used for the benefit of society as a whole.

Looking ahead, AI has the potential to solve complex global problems, from climate change to resource management. By combining human creativity with machine intelligence, the future of AI could lead to a more efficient, innovative, and connected world.

Answer the true/false questions below. Circle the correct answer.

1. AI refers to machines that can perform tasks requiring human intelligence.

Answer: True False

2. AI is only used in scientific research and not in everyday life.

Answer: True False

3. Voice assistants and recommendation systems are examples of AI.

Answer: True False

4. AI cannot help improve medical diagnoses.

Answer: True False

5. AI systems can process large amounts of data quickly.

Answer: True False

6. AI development does not raise any ethical concerns.

Answer: True False

7. Data privacy is one of the concerns related to AI.

Answer: True False

8. AI has no impact on jobs.

Answer: True False

9. AI could help solve global problems like climate change.

Answer: True False

10. AI replaces the need for human creativity entirely.

Answer: True False

B. ENGLISH IN USE.

Write the correct answer in the gaps. (40 points)

1. My uncle is high school teacher.

A. a **B.** an **C.** ones **D.** these

2. Tuesday afternoon, we are going skateboarding.

A. The **B.** In **C.** At **D.** On

3. Careful! There is water the floor.
A. for **B.** since **C.** at **D.** on
4. My cousins enjoy thriller books.
A. to have read **B.** to reading **C.** reading **D.** to having readings
5. Peter to Bristol five years ago.
A. moved **B.** have moved **C.** has moved **D.** has move
6. William, any more sandwiches in the fridge?
A. are there **B.** is there **C.** there is **D.** is
7. Jane listens the radio. She doesn't like TV.
A. away **B.** in **C.** to **D.** for
8. My bicycle, is red and blue, is in the garage.
A. who **B.** whom **C.** which **D.** what
9. This football player is really good running.
A. to **B.** in **C.** at **D.** on
10. My son has to take books with him when going to school.
A. much **B.** many **C.** any **D.** a little
11. The students enjoyed the visit to the zoo because many animals.
A. it was **B.** they were **C.** there was **D.** there were
12. The clothes we usually buy in China.
A. are made **B.** made **C.** make **D.** have made
13. Her brother asked Mary if the new neighbours.
A. she had meet **B.** has she met **C.** she has met **D.** has she meet
14. Last night, I fell asleep while my friend to me on the phone.
A. was talked **B.** was talking **C.** talk **D.** had talking

15. When did she buy that painting? She it last year.
A. buyed B. bought C. has buy D. buys
16. I for a walk with you if you help me clean the room.
A. will go B. have gone C. going D. went
17. Peterswimming, but he loves the sea.
A. likes not B. don't like C. are not liking D. doesn't like
18. water should a person drink in a day? At least one litre.
A. Which B. How many C. How much D. What
19. I want to know where
A. Jane work B. works Jane C. does Jane work D. Jane works
20. This box is the one I lost.
A. the smallest B. small C. smallest that D. smaller than

B. WRITING: *Should governments regulate artificial intelligence more strictly? Advantages and disadvantages of controlling AI.*

Write a 120-word composition giving your opinion about that question. Here you have two pieces of news that might help you with some ideas. (40 points)

*'A recent report says that Bernie Sanders and Alexandria Ocasio-Cortez have proposed a new law in the United States to **pause the construction of AI data centers**. The goal is to give the government time to create stronger rules for artificial intelligence. The proposal responds to concerns about **environmental damage, high energy use, and job impacts** caused by AI systems.'*

The Guardian, March 2026

*'At the same time, not everyone agrees. Some business leaders warn that **too much regulation could slow innovation** and make countries less competitive in AI development.'*

The Times of India, March 2026
